PEDRO TORTORIELLO

Software Engineer — Full Stack Development & Automation

pedrooofreitas@gmail.com linkedin.com/in/pedro-tortoriello github.com/PedroTortoriello

São Paulo, Brazil · remote

SUMMARY

Software engineer building scalable applications, intelligent automation systems and high-performance digital experiences: web apps, APIs, integrations, automations and applied AI. Since 2021: client work and my own products, then teams in Brazil and remote roles with US-based teams, working in English.

EXPERIENCE

Senior Software Engineer — Bradesco Private Bank 2026 – Now

Remote · Miami, US · US-based team

The bank's middleware platform: designing and maintaining scalable microservices in Node.js (NestJS) and Java (Spring Boot), REST APIs secured with OAuth2, JWT and OIDC, and messaging between services, with code review and troubleshooting. Working in English with the bank's team.

Stack: Node.js, NestJS, Java, Spring Boot, Microservices, TypeScript, React, Docker, OAuth2 / OIDC

Senior Software Developer — Maximum Marketing 2026 – Now

Remote · Brazil

Developer of CadenceFlow, the agency's multi-tenant prospecting platform (lead lists and AI qualification, email, WhatsApp and LinkedIn cadences, team seats and permissions), and of my parts of Agente SDR, its SDR agent (the WhatsApp ingress and the outbound router). Landing pages and sites for the agency's clients, too.

Stack: Next.js, TypeScript, PostgreSQL, Prisma, Meta Cloud API, Astro

Mid-level Software Engineer — Addon Software 2025 – 2026

Remote · Brazil

End-to-end platform features in TypeScript, Node.js and REST APIs. Business and product requirements turned into technical scope with the team, production support through log analysis, troubleshooting and incident fixes, and continuous refactoring under code review.

Stack: TypeScript, Node.js, REST APIs, Git

Mid-level Software Engineer — 1 Call Closers / V Shred 2025

Remote · California, US · US-based team

Web applications in Next.js, React, TypeScript and Node.js on top of third-party REST APIs, and automations across platforms with n8n, Zapier and Make that removed manual work from sales, scheduling and operational reporting. A fully remote, distributed US team, working in English.

Stack: Next.js, React, TypeScript, Node.js, n8n, Zapier, Make

Software Development Intern — Four 2023 – 2024

Indaiatuba · Brazil

Responsive interfaces in React, Next.js and Tailwind CSS, back-end services in Node.js, MongoDB and REST APIs, and integrations between corporate systems, from validation and testing to support. Scrum and Kanban, with code review on GitHub.

Stack: React, Next.js, Tailwind CSS, Node.js, MongoDB

Full Stack Development & Digital Products — Independent Engineering 2021 – Now

Remote · Worldwide

Web applications for clients and my own products, from requirements and architecture to release, documentation and post-launch support: SaaS and back-office interfaces, role-based access in the UI and the API, payments, applied AI and a shared component library.

Stack: React, Next.js, TypeScript, Supabase, Stripe, AI

SELECTED PROJECTS

CadenceFlow — SaaS / Automation / AI 2026

Solo · full stack · Live

A multi-tenant sales automation platform combining prospecting, intelligent workflows, CRM integrations and AI-powered communication.

cadenceflow.pro

Stack: Next.js 16, React 19, TypeScript, Prisma 7, PostgreSQL, Nginx, PM2, Meta Cloud API

Finance Platform — Fintech / Full Stack / Product Engineering 2026

Solo · product and engineering · Ships as MyWay (codebase MoneyFlow) · Live · PWA

A personal finance platform designed to help users organize expenses, manage financial goals, analyze scenarios and make better financial decisions.

moneyflow-pedro.vercel.app

Stack: TypeScript, React, React Native, Expo, Expo Router, react-native-web, Zustand, Supabase

Legal Intelligence — Legaltech / AI / Automation 2026

Solo · full stack · Ships as RitoTech · Live

An intelligent legal workflow platform designed for court-case tracking, daily updates, deadline organization, document generation and AI-assisted analysis.

ritotech.vercel.app

Stack: Next.js 16, React 19, TypeScript, Supabase Auth, PostgreSQL (RLS), postgres.js, Anthropic SDK (Claude), OpenAI-compatible API

Automation Infrastructure — Backend / Integrations / Systems 2025 – 2026

Own product, co-developed product and in-house automation work · In production

Advanced automation workflows connecting multiple business platforms, APIs, databases and communication services.

nucleoaut.vercel.app sdr.cadenceflow.pro

Stack: Node.js, TypeScript, Express, Next.js, Prisma, PostgreSQL, Supabase pg_cron · pg_net, Vercel Functions

SKILLS

Frontend	React, Next.js, TypeScript, JavaScript, React Native, Tailwind CSS, HTML / CSS, Design Systems, Jest · Cypress
Backend	Node.js, NestJS, Java, Spring Boot, Python, REST · GraphQL, Microservices, PostgreSQL, MongoDB, Supabase, System Architecture
Automation & AI	n8n, Make, Zapier, OpenAI API, AI Agents, AI Integrations, Webhooks, Workflow Engineering
Infrastructure	AWS, Google Cloud, Docker, Kubernetes, Terraform, CI/CD · GitHub Actions, Vercel, Redis, Git, Database Design

EDUCATION

Systems Analysis and Development — FACENS · Centro Universitário Facens, Sorocaba, Brazil
